**D**URE rubber, fresh from the thick cream.

In working rubber into a tire, keeping it white is keeping it pure.

Adding another color may add "style" for those who like BLACK tread, or "difference" for those who prefer a RED one — but it adds nothing to resistence, resiliency or grip.

These distinctive rubber-qualities are at their best when unalloyed, when left in their natural whiteness, purity and strength.

FEDERAL-made tires are just as nearly pure white as they can be made. All the toughness, "give" and clinging qualities inherent in pure white rubber are left in every FEDERAL tire; every catch-penny device to please a passing "style" or whim is *left out*.

This is one reason why you remember the FEDERAL imprint long after the tire itself has satisfied you with extra service, safety and mileage—why the FEDERAL is the WHITEST tire you know!
